
iRecord Training Days

Thursday 21st February 10-12 am & Thursday 14th March 10-12 am

Tutor – Steve Garland

These free sessions will be suitable for anyone wanting to begin using iRecord or to people who have started to use it, but would like to learn a bit more about how it works and what it can do.

If there is a demand, there will be more sessions run in the future, with some at weekends.

To gain maximum benefit, you will need a laptop, but we will also cover the basic use of the mobile App which will work on Apple iPhones or iPads or on Android smartphones or tablets.

What do you need to bring?

1. Essential - A laptop or tablet capable of logging onto the Internet via **WiFi**
2. Optional - A smartphone with the iRecord App installed (available on Google Play or App Store)

What do you need to do before the day?

1. Open your web-browser and create a personal account on iRecord on <https://www.brc.ac.uk/irecord/> . Your user name and password will also let you login on the mobile App. You may need to confirm your account via email. If you have any problems doing this, get in touch with me **well in advance** for help.

Remember to bring your login details on the day!

You will be given access to the Heysham network WiFi for the day to connect to the internet.
